

Technical Data Sheet

MALT EXTRACT AGAR No. 2 DEHYDRATED MEDIUM

Art. 84665.0500

Intended use

Solid medium for the isolation and enumeration of fungi.

Formula * - Composition in g/L

Malt extract.....	30.0
Soy peptone.....	3.0
Agar.....	15.0

Final pH 5.6 ±0.2 at 25 °C

* Adjusted and /or supplemented as required to meet performance criteria

Instructions for preparation

Suspend 48 g of powder in 1 l of purified water and let it soak. Bring to the boil and distribute into suitable containers. Sterilise in the autoclave at 121°C for 15 minutes.

Principle of the method and general information

Malt extract agar No. 2 promotes the growth of almost all fungi because of its balanced composition, and its ability to inhibit most bacteria due its low pH.

Should greater inhibition of bacterial growth be desired, readjust the pH to 3.5 by adding a sterile solution of 10% lactic acid or 5% tartaric acid to the molten medium. Do not reheat the medium after these additions.

Instruction for use

See appropriate normatives for specific procedures and techniques.

Quality control

Incubation temperature: 20-25°C

Incubation time: ≤ 5 days

Inoculum: Practical range 100 ± 20 CFU. Min. 50 CFU (productivity) according to ISO 11133:2014/Amd 1:2018. Spiral Plate Method.

Microorganism

Aspergillus brasiliensis ATCC® 16404
Saccharomyces cerevisiae ATCC® 9763
Candida albicans ATCC® 10231

Growth

Productivity > 0.70
 Productivity > 0.70
 Productivity > 0.70

Remarks

5 days (black)
 2 days (white)
 2 days (white)

Storage conditions

For laboratory use only. Keep tightly closed, away from bright light, in a cool dry place (+4 °C to 30 °C).

Ordering information

84665.0500 MALT EXTRACT AGAR No. 2 Bulk of 500 g.

Note: For supplements see the section - Instructions for preparation.
